

Galapagos is a drug discovery company with pre-clinical programs in bone and joint diseases and bone metastasis. Our service division BioFocus DPI offers a full suite of target-to-drug discovery products and services, ranging from target discovery and assay development to medicinal chemistry and predictive drug discovery. The company has established collaborations in drug discovery with most major pharma and biotech companies. Our research activities in five European countries and the US are successful thanks to our highly motivated staff of more than 450 employees, a unique technology base and a strong financial position.

For our Natural Products and Information Management Teams in Allschwil (Basel), Switzerland we are seeking an experienced

**Scientific Software Engineer/
Database Programmer
(BAS-006)**

with sound knowledge and preferably industrial experience in some of the following areas:

- Good command of high-level programming languages, preferably C++, Delphi and/or VB
- Object-oriented software design
- Conception and management of complex software systems using industry-standard tools
- Design of relational database systems (Oracle, MS-SQL Server) and implementation of user interfaces with standard API's
- Experience with the development of simple COM-interfaces
- Scientific background knowledge, preferably in the area of life sciences, is an advantage but not compulsory

If you are interested in this challenging opportunity, please send your application via e-mail to annette.grell@glpg.com or via post to:
